

Overview

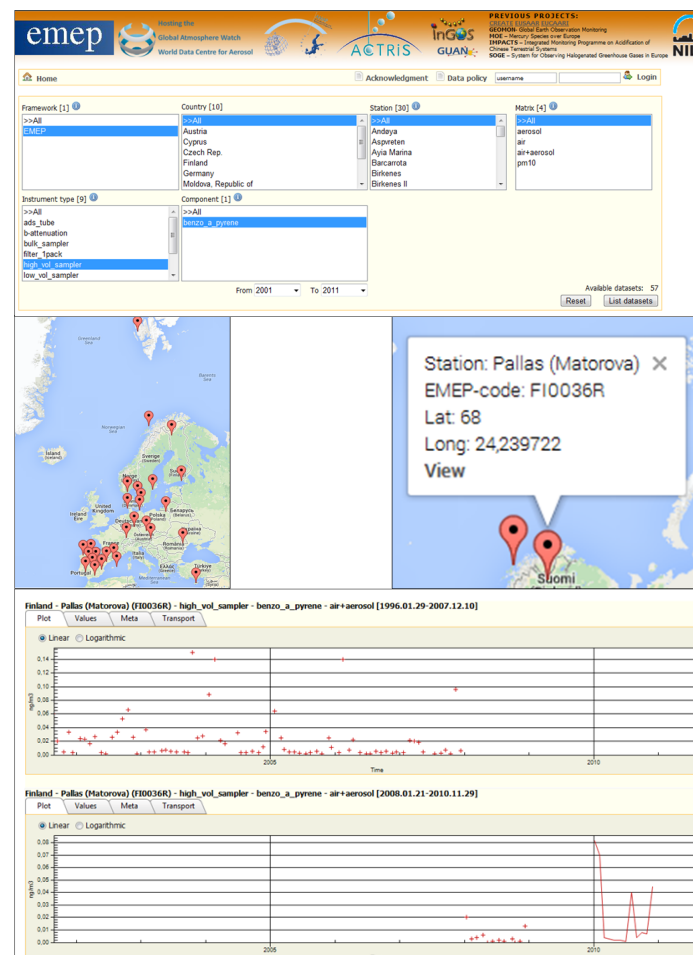

- The European Monitoring and Evaluation Programme (EMEP) is a scientifically based and policy driven programme under the Convention on Long-range Transboundary Air Pollution (CLRTAP) for international co-operation to solve transboundary air pollution problems.
- The EMEP Chemical Coordinating Centre (EMEP-CCC) coordinates the measurement programme of EMEP and includes recommendation of methods to be employed in the countries in their monitoring, quality assurance and training (including field and laboratory intercomparisons), data validation and reporting as well as data storage.
- All monitoring data are stored in the EMEP database (ebas.nilu.no).
